📄 SUMMARY

I'm a frontend developer with a strong focus on building clean, maintainable code and designing flexible project architectures. Passionate about creating responsive user interfaces, I excel both in collaborative team environments and independent problem-solving.

🏠 ORGANISATIONS

IranBroker [🔗](#)

01/2025 – present

Front-end Developer Full-time

- Built and optimized responsive landing pages aimed at lead generation, improving conversion rates.
- Redesigned and modernized a WordPress website originally built with pure JavaScript, enhancing performance and maintainability.
- Implemented Figma design systems into scalable frontend architectures, ensuring design consistency across projects.
- Focused on clean code principles and structured project setups to boost development efficiency.
- Collaborated with cross-functional teams to deliver high-quality features on time and solve technical challenges.
- Took initiative in problem-solving tasks, improving code quality and reducing critical issues in production.

Faramaham [🔗](#)

03/2024 – present

Front-end Developer (Hybrid/Part-time)

- Developed and maintained admin panels and web applications for various projects across different industries.
- Designed and structured scalable project bases to ensure faster onboarding and consistent development standards.
- Mentored junior developers by providing code reviews, technical guidance, and best practices training.
- Collaborated with design and backend teams to deliver high-quality, efficient frontend solutions.
- Advocated for clean code, reusable components, and modular architectures to enhance long-term project maintainability.

Vakilbashi [🔗](#)

05/2023 – 12/2024

Front-end Developer (Full-time)

- Developed two major digital products: an **online identity verification system** (including camera-based verification) and a **fully digital contract creation and signing platform**.

- Designed and implemented **multi-step forms** with real-time validation, optimized for both mobile and desktop experiences.
- Refactored the frontend of a legacy ASP.NET [🔗](#) website for better performance and maintainability.

Deltagroup [🔗](#)

06/2022 – 05/2023

Frontend Intern / Junior Developer (Full-time)

- Launched 2–3 frontend projects using **pure JavaScript**, focusing on core concepts such as DOM manipulation, event handling, and API integration.
- Self-learned and practiced modern frameworks including **Vue.js** and **React.js**, applying knowledge in demo projects and internal tasks.
- Gained practical experience in component-based design, routing, and basic state management.
